## Hansen Research and Extension Center

- California leads the nation in lemon production.
- The Hansen Agricultural Research and Extension Center (HAREC) provides researchers with facilities, fields and equipment to explore new irrigation, pest management and cultivation techniques for citrus and other crops.
- The Thelma Hansen Endowment Fund provides funding for research and education projects at HAREC.

To learn more about lemons and other fruits and vegetables grown at the Hansen Agricultural Research and Extension Center, please visit the Center's website.
